

LID LIST

lid: noun, an individual who impedes activity in a directed net by using nonstandard procedures.

The Lid List is a collection of words and phrases often used by operators not trained in efficient directed net operation. Don't make these words a part of your operating vocabulary. This list will be updated as needed to include the latest *cool* procedures.

1. **One for the count** Stations checking in to a directed training or traffic net are there to participate not to contribute to a total.
2. **Recheck** Simply announce your callsign and the proword OVER to get NECOS's attention. You only check in to a net once. You cannot recheck in to a net.
3. **Ten-four, Roger that** Codes, jargon and slang are unprofessional and are not used in emergency communications.
4. **Copy that** This may sound 'cool' on television or on the CB but not in a directed net. The trained operator simply replies, "Roger" when they have received an error-free message.
5. **Back to Net** The net control station is ALWAYS in control and does not need instructions from net participants. End your transmission with the proword OVER or OUT.
